

# BiteFX QuickStart

## Reactions to BiteFX QuickStart

*"The BiteFX has been an amazing addition to our consultation experience! Our patients, both new and existing, have given rave reviews. The QuickStart personal training allowed us to maximize the potential of the software. The cost for this personal training is minimal, and it allowed us to get through the learning curve quickly, and bring BiteFX to our patients immediately."*

-Richard Rogers, DDS, Frederick, MD

*"The QuickStart training was literally 'quick'. We were able to schedule it without delay and the trainer worked with us individually and as a team to complete the training program. The QuickStart training showed us how to customize the BiteFX consultation for each individual patient. We have now integrated the BiteFX software into all of our operatories so that each patient can see their own photographs in addition to the BiteFX animations to optimize the consultation process. QuickStart was worth every penny we paid for the training program."*

-Teresa Brenner, Office Manager,  
Robert Demboski DDS, Akron, OH

*"Love it! Love it! Love it! BiteFX has been a fantastic addition to our treatment process. The QuickStart personal training we received was awesome. QuickStart provided us with excellent and seamless integration information that enabled our practice to start using BiteFX immediately."*

-Raj Upadya, DMD, Florham Park, NJ

**BiteFX QuickStart™ is a personal four-course tutorial series that provides a comprehensive understanding of the many powerful features available within BiteFX to help you optimize its use and return on investment.**

Each BiteFX QuickStart session is approximately 30 minutes in duration to minimize interference with the dental practice, and maximize learning retention. Tutorial sessions are conducted via teleconference and participants use their own computer to follow the guidance of the BiteFX instructor as the features and controls are explained.

Topics covered include:

- A comprehensive overview of all BiteFX features and controls, and basic animation play.
- Use of the Photo Gallery and Picture Editor.
- Creation of Custom Sequences and use with PowerPoint.
- Integration of BiteFX into the patient consultation process to enhance patient understanding and sell cases.

QuickStart is excellent for New Purchasers, Trial Users, Long-Time BiteFX Users, and Dental Office Staff.

## QuickStart for New Purchasers

QuickStart was designed primarily with the needs of the new BiteFX user in mind. Your purchase of QuickStart with BiteFX enhances the benefits of BiteFX by teaching you to master the product quickly and effectively.

## QuickStart for Trial Users

QuickStart can be a great way to maximize your evaluation process after downloading a trial copy of BiteFX. For a small investment in the QuickStart personal tutorials, your ability to utilize BiteFX at its full potential will produce increased revenue and better patient understanding, even before the trial period elapses! PLUS, we'll refund your QuickStart purchase if you decide not to complete the QuickStart course after completing the first session!

## QuickStart for Long-Time BiteFX Users

Even experienced BiteFX dentists who have been using BiteFX for a long time are often unaware of the more powerful elements BiteFX provides, and are appreciating the comprehensive training they and their staff receive. With improved understanding of the full complement of features BiteFX offers, they are able to make better use of the great tool they already have in their hands.

## QuickStart for Dental Office Staff

Because QuickStart is conducted using teleconferencing, you are welcome to have your staff listen in to the tutorial calls. This can be a big benefit to you and your practice:

- Staff often gain a better understanding of occlusion from the sessions.
- You enable staff to assist in the consultation process.
- Support staff understand the role of BiteFX in the consultation process and the value it brings your patients.
